# INTRODUCTION

Artistic Concrete (EHPC) is a comprehensive decorative and practical product developed and designed over many years of technical accumulation.

It uses high performance concrete raw materials and has excellent durability, waterproofing and weather resistance, making it easy to clean and maintain, and can adapt to various complex environmental and climatic conditions.

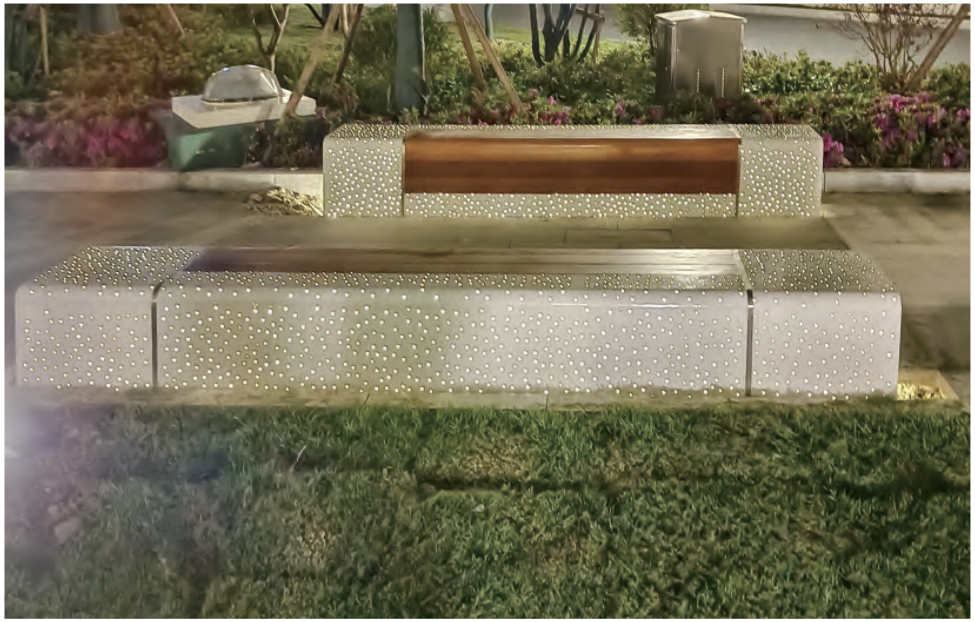

# TREE POOL BENCH

Artistic concrete (EHPC) has a wide range of applications and can be customized according to customers' needs. It is widely used in the interior and exterior decoration of various building and street, such as building decorated corridors, municipal square, parks and communities, etc.

It adds a unique artistic charm and personalized style to outdoor decoration.

Inspired by the concept of environmental protection, the Art Concrete Benches are made from high performance cement, construction solid waste, crushed stone, pebbles, fly ash and other materials, and the stone textured pre-fabricated benches and tree pools are manufactured through molds, transforming waste resources into beautiful and practical home décor items. Made from green raw materials, our high-performance art concrete benches are not only non-toxic and harmless, but also recyclable and reusable, achieving the goal of reducing environmental pollution.

Through exquisite craft smanship, our high-performance art concrete seating bench has excellent resistance to compression, bending and abrasion. Its sturdy structure and superior servic e life make it ideal for outdoor furniture.

Our Art Concrete Sitting Stool utilizes a unique design concept that blends modern aesthetic ties to reveal a simple yet elegant aesthetic. Its exquisite lines and textures allow people to enjoy comfort while appreciating the charm of art.

Eco-friendly high performance art concrete tree pool sitting bench is ideal for outdoor leisure furniture by virtue of its environmental protection, practicality and beauty.

Not only can it be used as a tree pool sitting bench, but also can be used as a display stand, flower stand and many other functions. Suitable for hotels, parks, squares, shopping center and other occasions, to meet your diverse needs.

High Performance Art Concrete Sitting Bench is easy to clean and maintain without a lot of your time and effort. It maintains its good appearance and performance even in harsh environments.

We provide customization service, you can customize unique art concrete tree pool seating bench according to your own preferences and needs. Create a distinctive and personalized space that will make your life more exciting.

While you are enjoying your comfort, you are also contributing to the environment!

## Artistic Concrete Tree Pool Seating

The material used for these seats is high-performance concrete, which has been water-polished to a smooth and delicate surface that blends in with the surrounding buildings and fully displays the beauty of modern landscape. The design of the planters also brings the seats closer to nature, not only serving a decorative purpose, but also providing a comfortable seating place.

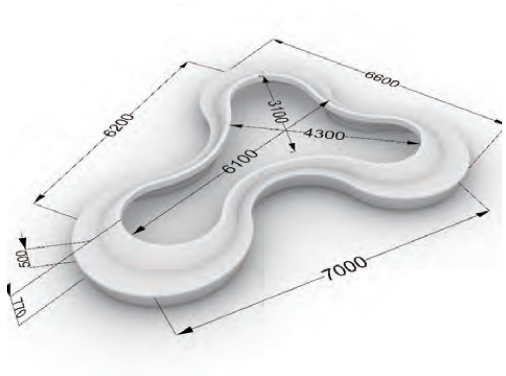

In this sky-garden landscape, people can enjoy the beautiful urban scenery, feel the breath of nature, and enjoy the sunshine and breeze, as well as the comfortable experience brought by these exquisitely designed planter seats.

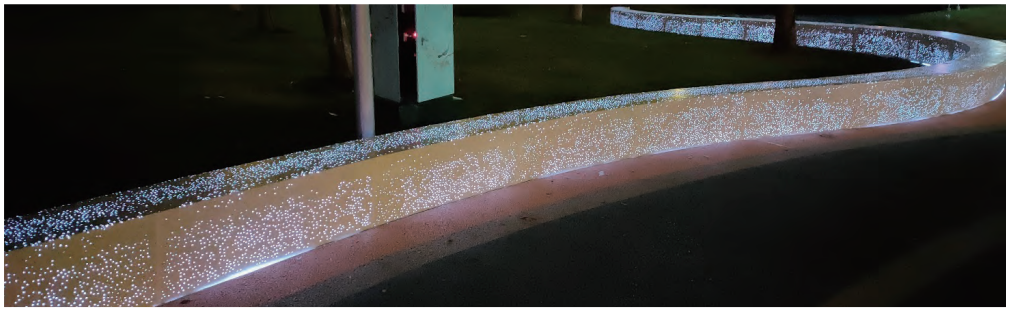

## Artistic Concrete Flower Pool

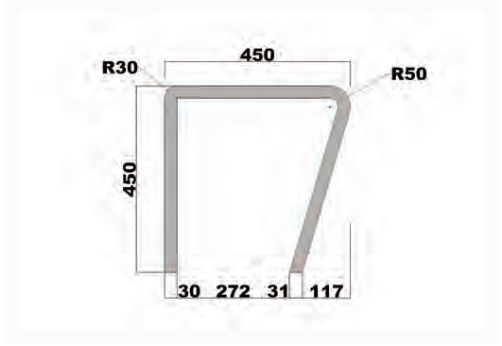

The Artistic Flower Pool Bench resembles three blooming leaves. Its smooth and graceful curves are stunning. Made of high-performance concrete material, it is extremely durable and stable. The seats glisten with colorful flowers, blooming in the clear water like a rainbow.

Sitting on the flower pool bench, feeling the sunshine and breeze, you will feel the care and joy of your seat. This artistic flower pool bench is not only a beautiful scenery in the urban landscape but also an ideal place for people to rest and relax.

## Translucent Artistic Concrete Bench

The Light-transmitting concrete sitting bench is unique and comfortable. It is made of concrete with embedded optical fibers that allow light to pass through, creating a mysterious and dreamy atmosphere. At the same time, this material provides a more comfortable resting experience, allowing you to relax while enjoying the nature. You can sit on the translucent concrete bench, slowly savoring the beauty of nature, feeling the accumulation of history and the influence of culture. The scenery here is not only beautiful but also unforgettable. The translucent concrete bench adds a unique charm to this beauty, leaving you with beautiful memories of your journey.

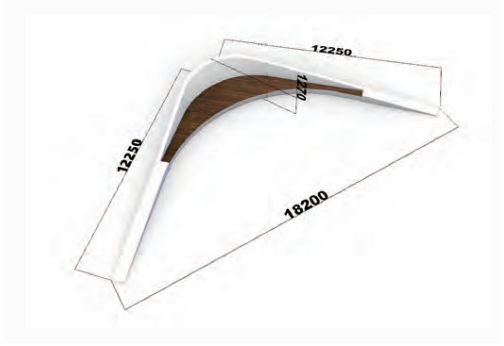

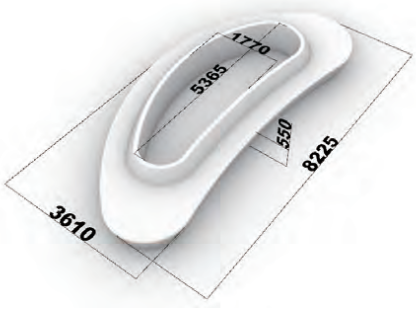

## Shaped Art Concrete Bench

High-performance concrete is the core material of the unique bench, which has excellent strength and durability, can withstand a large amount of weight, and can withstand various weather conditions. Designers have integrated arc-shaped elements to form a beautiful crescent shape, and have also used anti-corrosion wood as an auxiliary material to ensure the bench's beauty and durability. The use of high-performance concrete and anti-corrosion wood materials ensures the bench's long-term quality and appearance. The design, which focuses on high-performance concrete, makes the bench more structurally robust while also being more aesthetically pleasing.

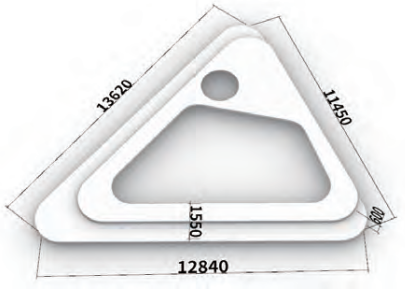

## Artistic Concrete Tree Pond

This bench is designed in the shape of a ship and made of concrete, making it strong and durable. The bench's design complements the surrounding environment, as if people are on a ship at sea, enjoying comfort and relaxation. The base of the bench is wide, stable, and comfortable, allowing people to sit down and place various items on it. The backrest of the bench is inclined at an appropriate angle, allowing people to relax and enjoy the beautiful scenery around them.

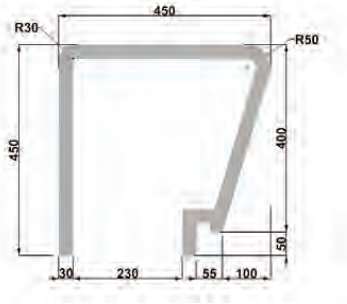

## Artistic Concrete Landscape Tree Pool Bench

The landscape planter bench is inspired by a large triangular shape, presenting an exquisite and modern appearance. The double-layer design not only provides a comfortable resting place for people but also perfectly wraps the trees in the middle, creating a unique landscape effect. To ensure high product quality, w e h a s chosen high-performance concrete as the raw materiel to ensure product stability and durability. Through careful production and meticulous design, this planter bench presents a distinctive style in appearance while also providing a comfortable and practical resting place for people.

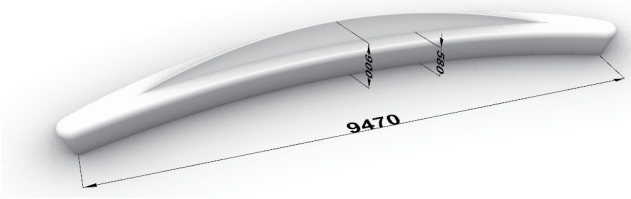

## Artistic Concrete Curved Bench

These curved benches and backrest seats made of precast concrete materials are not only durable but also adaptable to various complex weather conditions. Against the backdrop of natural scenery, these benches and seats blend perfectly into the environment, allowing people to rest and enjoy the surrounding beauty at the same time. These benches and seats are made of precast concrete materials and installed on site, with a stable structure and exquisite appearance.

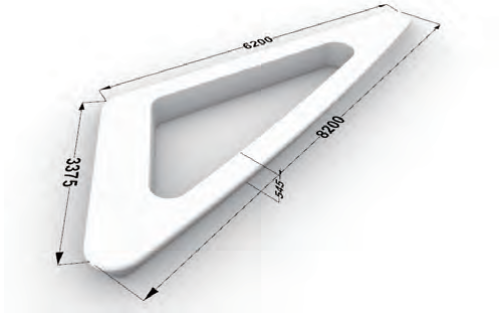

## Concrete Irregular Tree Planter Bench

Made of high-strength concrete material, the concrete irregular tree planter bench has a smooth and delicate surface that makes people want to touch it. This special concrete material is not only durable but also easy to clean, without worrying about cleaning problems during daily use. Its simple and stylish appearance design blends perfectly into the surrounding environment, adding an elegant touch of color to the square.

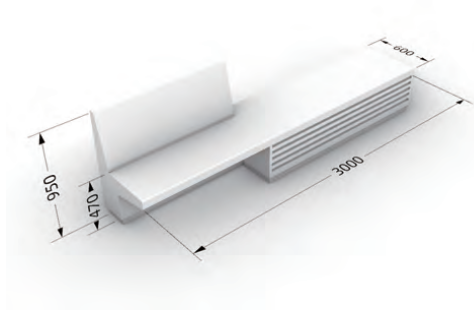

## Concrete Irregular Tree Planter Bench

The shaped triangular shaped concrete tree pool sitting bench is a unique landscape design element, which is a combination of a triangular tree pool made of concrete and a sitting bench. Its shape is very unique and can bring a modern and artistic sense to the square. At the same time, it is also a practical design because the combination of tree pool and sitting bench can provide a comfortable resting place for people and also increase the green area of the square.

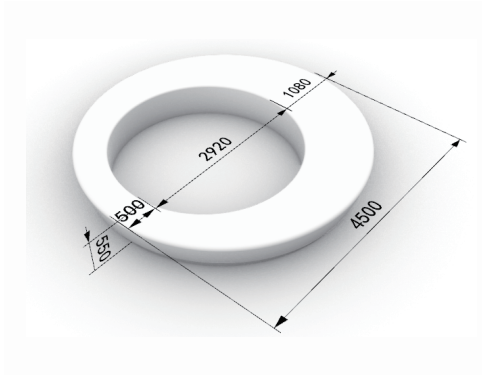

## Backrest Shaped Sitting Bench

This innovatively designed concrete bench is divided into two parts, left and right, each with a comfortable backrest that provides unparalleled comfort during breaks. The lower part of the bench is designed with a grid shape, which not only increases the aesthetics of the bench, but also provides an interactive platform for citizens to gather, rest, and communicate. Whether alone or with friends, this bench is a perfect choice.

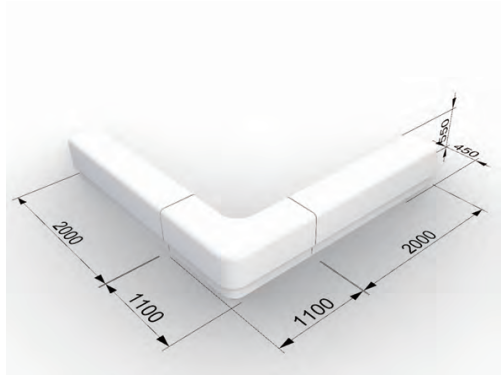

## Wetland Park Art Concrete

Located in the Eco Park, this custom tree bed is made of high performance concrete and provides a comfortable resting place for visitors. The altar body adopts a green design concept, which not only protects the trees but also integrates perfectly with the surrounding natural environment, adding a unique aesthetic to the park. The smooth and delicate surface of the tree bed makes people want to touch it, and people can feel the texture and temperature of the concrete while sitting down and resting, injecting a special artistic atmosphere to the whole park.

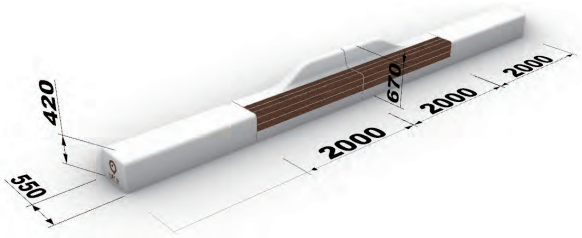

## L-Shaped Art Concrete Bench

This L-shaped concrete tree planter bench is made of high-performance concrete materials and designed to complement Taihu Square's layout. Its unique aesthetic creates a semi-open, semi-closed artistic atmosphere. The bench is highly practical, offering visitors a comfortable resting place with excellent durability. The smooth, dirt-resistant surface maintains its appearance even after years of use. Visitors can enjoy the surrounding scenery while experiencing comfort and stability.

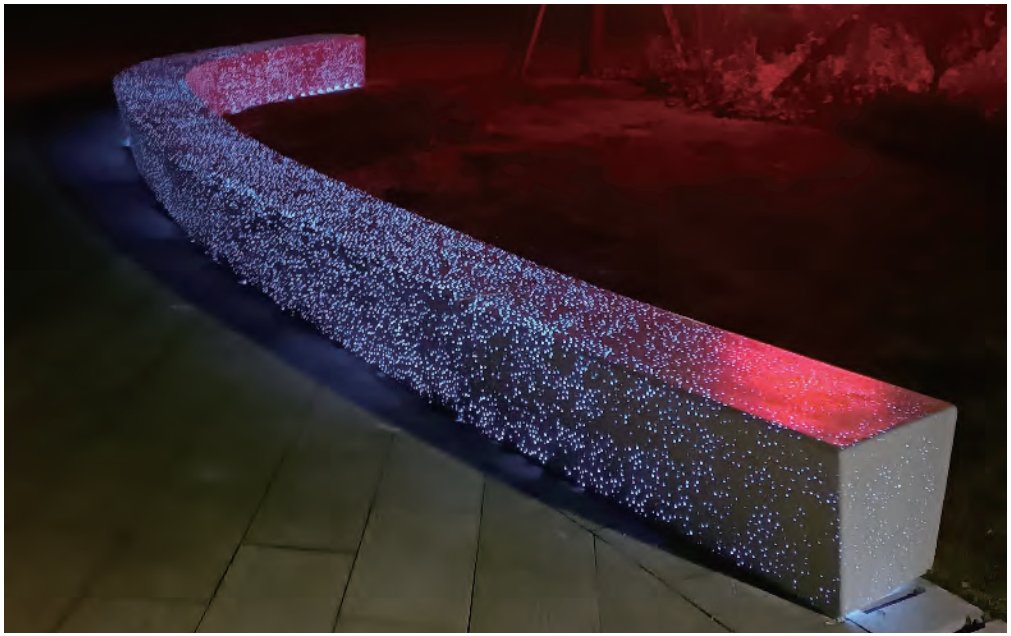

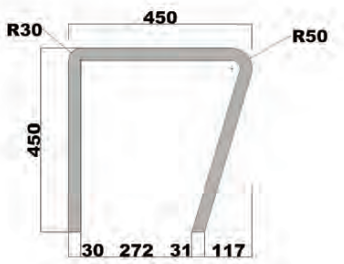

## Anti-Corrosion Wood Concrete Translucent Sitting Bench

This seating bench is made of a perfect combination of concrete and anticorrosive wood, which can not only bear the weight but also resist the wind, rain and sunlight exposure. The embedded highly translucent light-guiding fiber not only adds a unique light color to the seat, but also increases the beauty of the night view of Taihu Square.

GOLD STONE

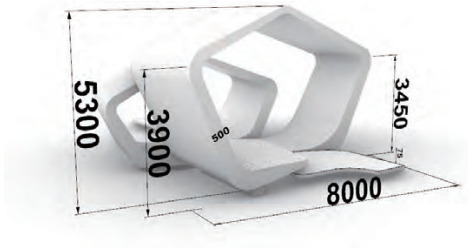

## Translucent Artistic Concrete Bench

Provide people with a beautiful and comfortable resting place, while also increasing the sense of technology and artistic atmosphere of the outdoor environment.

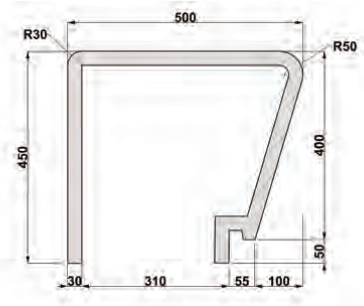

## Translucent Art Concrete Landscape Gazebo

The pavilion has a beautiful shape with simple and smooth lines that naturally blend into the surrounding natural landscape. Under the sunlight, the surface of the translucent concrete emits a soft glow, adding a mysterious charm to the gazebo. At the same time, the light-transmitting concrete material can effectively resist the erosion of ultraviolet rays, and has good weather resistance and durability, so that the beauty of this gazebo can be maintained for a long time.

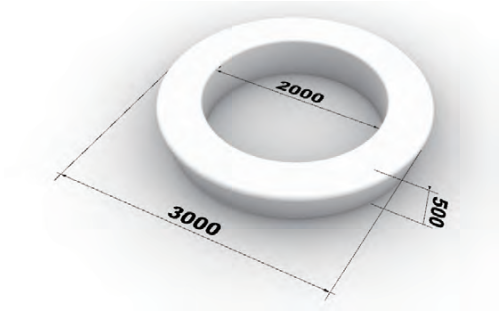

## Artistic Concrete Landscape Bar Stool

Art concrete urban landscape bar stool has a unique shape design, showing a streamlined curved shape, while combining aesthetic elements of modern architecture, making it both practical and decorative. Its main material is concrete, which can be stained or painted as needed to suit different environments and occasions. Its design is inspired by the square and adopts the square shape, which makes it a good balance of aesthetics and practicality. The sitting stool has a smooth and delicate surface, smooth lines, and a square and rigid appearance.

## Artistic Concrete Round Back Seat

This chair is an artistic upholstery seat made of high strength concrete. Its seat is inspired by a round shape, while the seat back has a unique curved design, which is both beautiful and practical. The smooth and delicate surface and smooth lines of the seat, the round shape and concrete material together create a simple, modern and sophisticated atmosphere.

## Artistic Concrete Preserved Wood Sitting Bench

Its design is inspired by the natural environment and combines the sturdiness of concrete and the warmth of anticorrosive wood, with good aesthetics and practicality. The sitting stool has a smooth and delicate surface with smooth lines, and the combination of concrete and anticorrosive wood makes it more durable and stable in the outdoor environment.

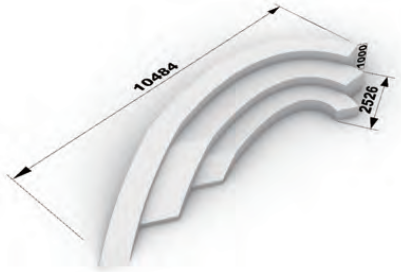

## Artistic Concrete View Pavilion Sitting Bench

Combining the pavilion and the sitting stool together not only increases the ornamental nature, but also facilitates people to rest. The sitting stool has a smooth and delicate surface and smooth lines, and the unique design creates a quaint and elegant atmosphere.

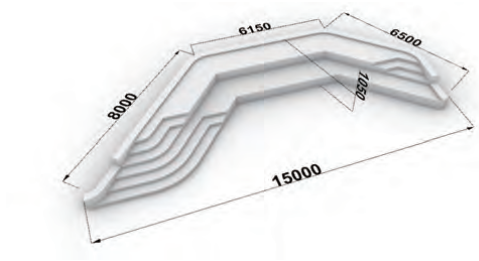

## Artistic Concrete Step Sitting Bench

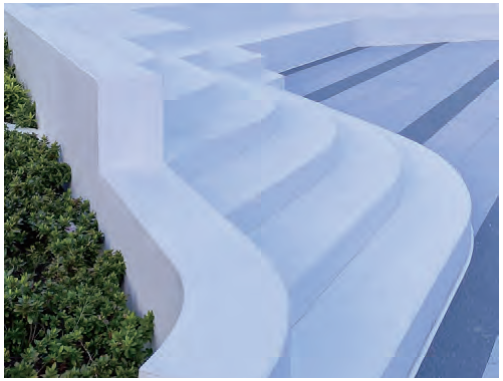

The Step bench is a unique, practical and ornamental outdoor furniture made of high-strength concrete with a white surface. Its design is inspired by the natural environment of steps and sitting stools, combining the two together, both beautiful and practical, but also convenient for people to rest. The surface of the bench is smooth and delicate, with smooth lines, and the stepped design makes it more stable and also increases the ornamental nature.

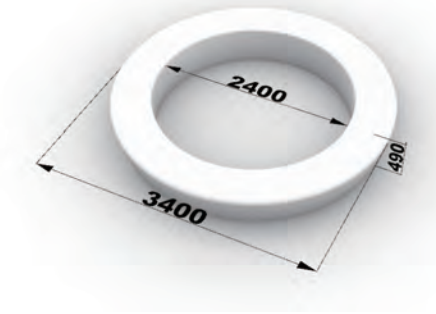

## Urban Artistic Concrete Leisure Sitting

The City View leisure steps are made of white concrete, with a flat surface for passengers to sit and rest on, and the steps are of moderate height and width for easy access. The simple and elegant design of the concrete steps complements the overall style of the modern urban landscape.

## Artistic Concrete Ring Tree Pond

Made of high-strength concrete material, the ring shaped design can be placed in outdoor urban landscapes, which not only protects trees, adds a green atmosphere and artistic sense to the city, but also beautifies the urban environment and improves people's quality of life.

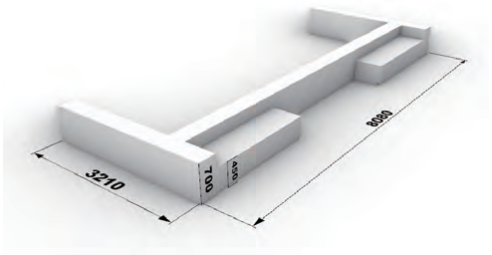

## Artistic Concrete Custom Outdoor Sitting Bench

Made of high-strength concrete material, it can be personalized and customized to meet the aesthetic and usage needs of different customers.

## Art Concrete Preserved Wood Sitting Bench

The outdoor landscape design combining concrete and wood can not only meet people's resting needs, but also add a natural and ecological element to the outdoor environment and improve people's quality of life. It can be placed in parks, squares, courtyards and other outdoor places to provide people with a beautiful and comfortable resting place.

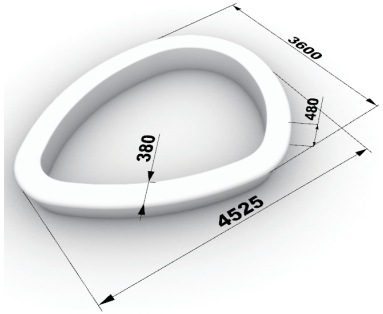

## Artistic Concrete Oval Tree Pond

The elliptical tree pond is an urban landscape with both practical and aesthetic value, made of concrete, with high strength and durability, while presenting an elliptical design style that provides a beautiful and comfortable environment in outdoor plazas and other places.

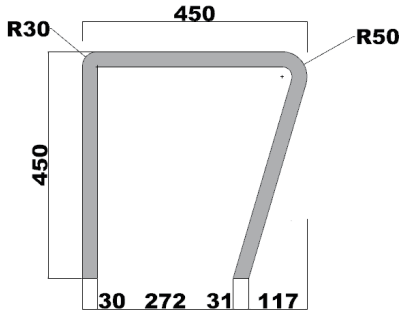

## Artistic Concrete Landscape Tree Pond

Artistic concrete landscape tree pools add greenery to the urban environment and can also create an urban landscape with an artistic atmosphere.

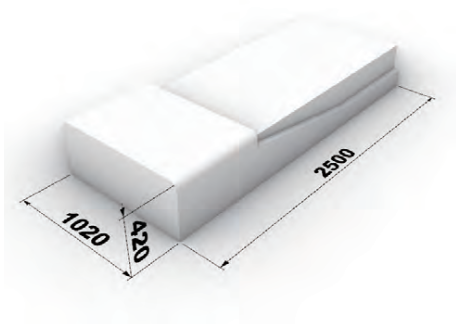

## Light-transmitting Concrete Art Bench

The light-transmitting concrete bench can add a sense of modernity and technology to the city through its unique light effect. At night, the translucent concrete bench can create a unique light and shadow effect through the irradiation of internal lights, adding a beautiful night scene to the city.

## Fair-Faced Concrete Sitting Bench

This sitting bench idea is a creative design that combines concrete and metal grill. It is made of fair-faced concrete material with a natural stone texture and feel, but also very solid and durable. The metal grille can be used to strengthen the structure of the seat, and provide good support and comfort for the bench. In addition, the metal grille can be used to create different design elements and visual effects, creating the texture and pattern of the stool through different shapes and arrangements, making it more decorative and aesthetic.

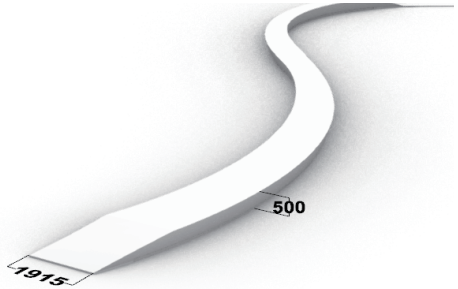

## Concrete Art Patio Tree Pond

A courtyard concrete art tree pool is a creative combination of concrete art and landscape design. It is a decorative tree pool used to add green vegetation and aesthetic value in courtyards, gardens and public spaces. It is made of concrete material with strong durability and malleability, and can be customized according to the designer's ideas and themes.

## Artistic Concrete Shaped Seats

This large S-shaped art strip sitting stool is made of concrete. Its surface is smooth and delicate, winding, presenting a smooth and natural curve beauty. It is organically combined with the eco-sports park, and besides serving as a resting place, it is also a landscape in the park, bringing visual enjoyment to the visitors and feeling the pleasure and tranquility brought by the natural beauty.

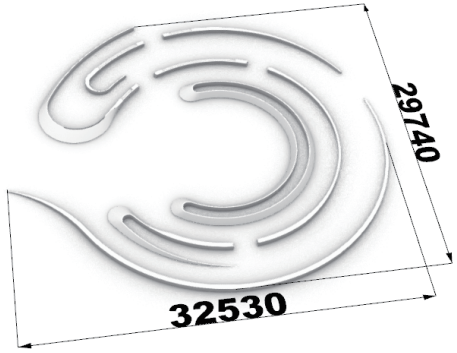

## Artistic Concrete Shaped Tree

The large art concrete tree pond decorates the urban landscape, which is a unique urban art landscape. It is built with high performance concrete, which not only has high strength and durability, but also presents a delicate texture. It draws inspiration from nature, culture and history, and incorporates modern design concepts and technical means. Every detail is carefully sculpted so that the whole landscape presents a harmonious, harmonious and natural aesthetic. Here, people can enjoy the perfect combination of nature and art, feel the vitality and vigor of the city, and experience the charm and touch of art.

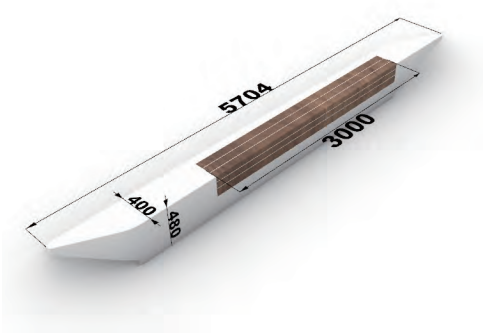

## Artistic Concrete Flower Beds

The application of artistic concrete plays a representative role in the design of the flower bed. By adopting the design of static rotating shape, the flower bed looks dynamic and full of vitality from top to bottom. Together with the embellishment of later planting, it creates a vibrant and harmonious scene of life. During the production of the f lower beds, the application of high-performance concrete materials ensures the quality. The produced flower beds have a delicate and smooth surface layer, which not only provides a comfortable resting environment for visitors, but also a beautiful landscape.

## Artistic Concrete Customized Sitting Bench

This artistic concrete customized sitting bench features a tightened design at both ends for a clear structure and hard lines. The high-performance concrete ensures strength comparable to raw stone, and the buffed surface adds to its smooth, wear-resistant character, with preserved wood embedded in the center for resting during walks.

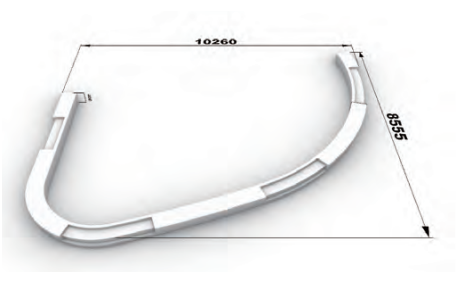

## Artistic Concrete Translucent Bench

This sitting bench is a beautiful piece of high-performance concrete and preserved wood that also incorporates translucent craftsmanship to present a simple yet textured design. Its unique appearance and functionality make it a beautiful addition to the outdoor environment. The design of the bench is inspired by the combination of nature and modernity. The embedded preserved wood area in the center provides a comfortable resting space for people to take a break while strolling. The warmth of the preserved wood complements the stability of the high performance concrete, creating a harmonious blend of nature and modernity.

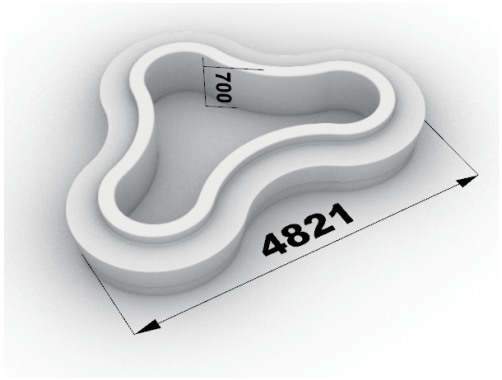

## Art Concrete Anti-corrosion Wooden Leisure Bench

This semi-enclosed seating bench is designed to suit the location and blend with its surroundings. Made of high-performance concrete, it ensures strength and stability with a smooth, wear-resistant, and dirt-resistant surface. The material maintains its beauty and stability despite prolonged exposure to weather. The embedded anticorrosive wood at the center provides comfortable seating and enhances durability in humid environments.

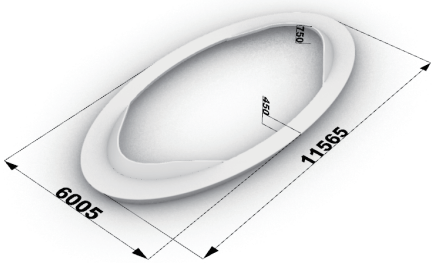

## Artistic Concrete Modeling Tree Pool

This petal-shaped sitting stool features an aesthetically pleasing design that blends seamlessly with natural surroundings. Made with high-strength white cement, it offers excellent durability, scratch resistance, and dirt resistance, withstanding various weather conditions. Its smooth, delicate surface provides comfortable seating while maintaining its beauty for years.

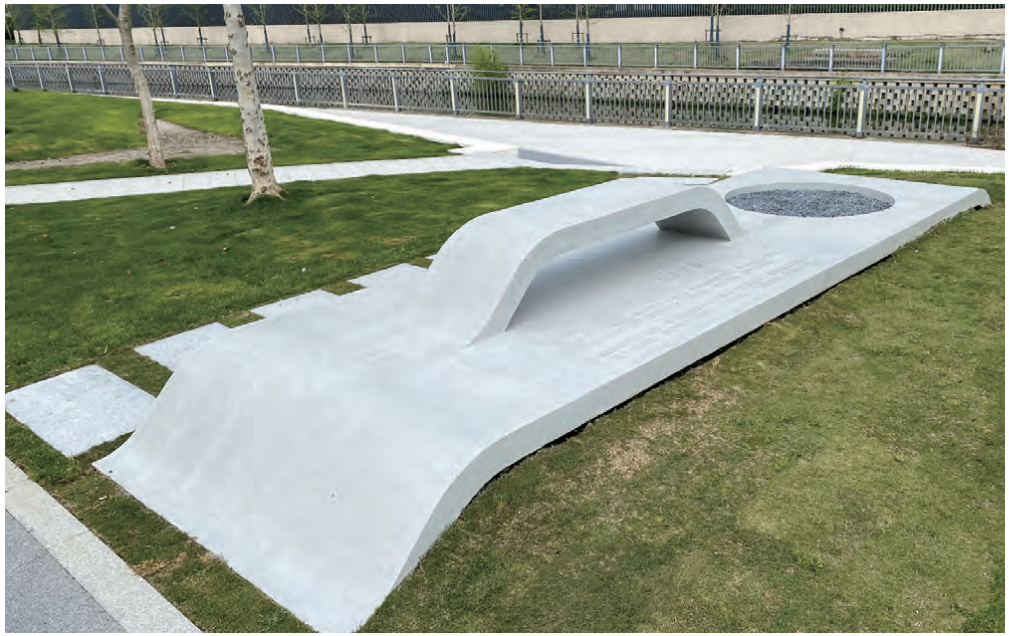

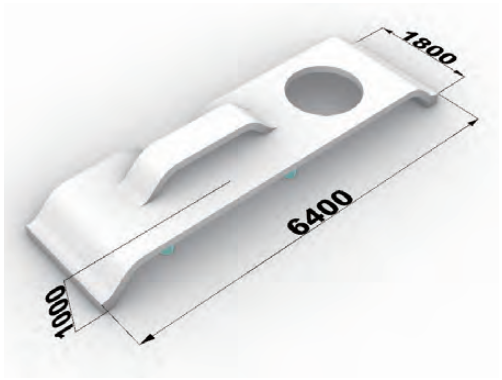

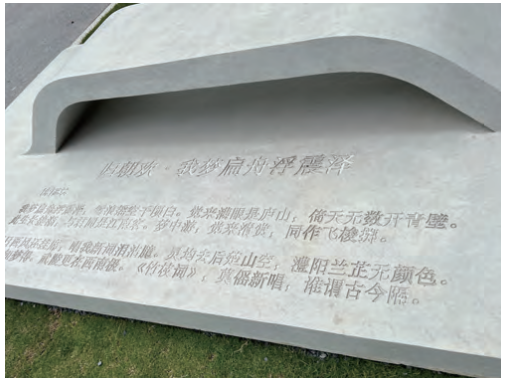

## Artistic Concrete Modeling Tree Pool

This custom tree pool features an oval, scallop-like shape that is aesthetically pleasing and blends beautifully with urban surroundings, adding a modern, artistic touch to city squares. Made with high-strength white cement, it ensures exceptional durability and can withstand harsh climatic conditions. The multi-process production creates a smooth, delicate surface that resists scratches and pollution.

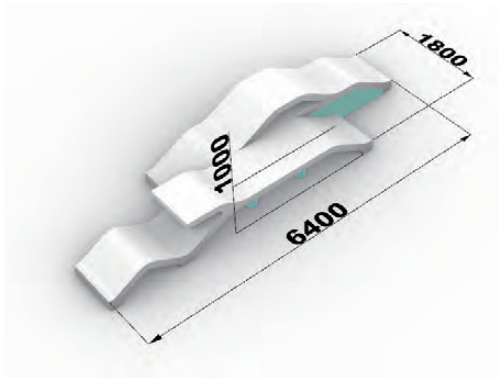

## Fair-Faced Concrete Artisticsitting Bench

This fair-faced concrete art custom bench is a unique urban art piece. It is made of high quality fair-faced concrete material, and after a fine production process, it presents a natural and delicate texture, exuding a simple and natural atmosphere. The bench is engraved with poems of cultural value, combining historical heritage and cultural inheritance, allowing people to appreciate the artwork while feeling the profound historical connotation and cultural accumulation. This sitting stool is not only practical, but also can add a unique artistic atmosphere to the city, allowing people to find a beautiful and quiet in the busy city life.

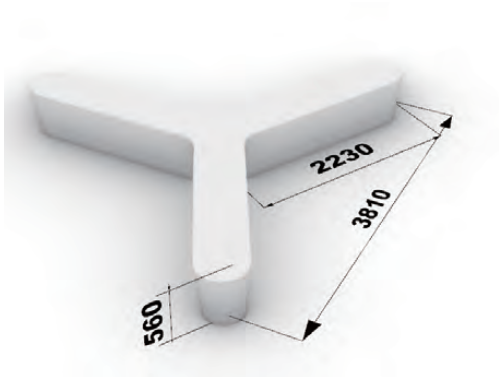

## Fair-Faced Concrete Artisticsitting Bench

This artistic sitting bench made of high quality fair-faced concrete material is a very unique piece of urban landscape. It is engraved with poems of cultural value, allowing people to feel the profound cultural connotation and humanistic sentiment while resting and enjoying the artwork. This bench is made of fair-faced concrete, which not only has strength and durability, but also presents a natural texture and exudes a simple and natural atmosphere. Set in urban parks and other outdoor spaces, this art bench can provide a comfortable resting place for people, while also adding a unique artistic atmosphere to the city.

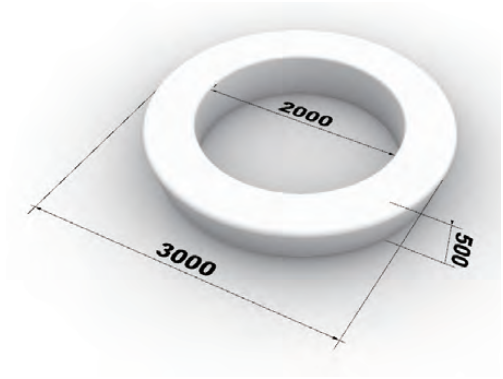

## Artistic Concrete Custom Seating Bench

This park sitting bench with Y-shaped structure shape is a highly modern and artistic urban landscape. It is made of high performance concrete as the raw material, and after a f ine production process, it not only has high strength and high durability, but also presents smooth lines and dynamic shape. The Y-shaped structure of this park landscape is not only unique and beautiful, but also has certain practicality, which can provide a comfortable resting place for people. Set in the park landscape, this Y-shaped structure park landscape can add a sense of modernity and art to the city, so that people can feel a sense of beauty and tranquility in the busy city life.

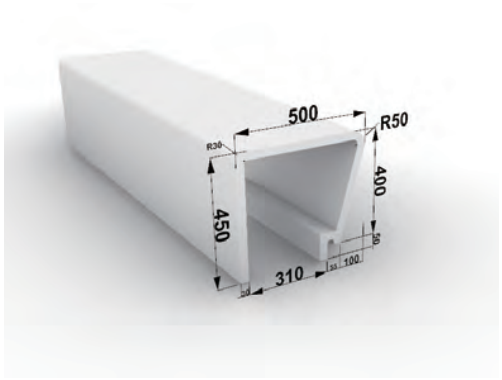

## Artistic Concrete Ring Tree Pond

This fair-faced concrete ring tree pond is a beautiful design with a modern and natural aesthetic. It is made of high performance concrete material, which not only has excellent durability and compressive strength, but also has a natural texture and rustic aesthetics on its surface, blending perfectly with the surrounding park environment. The design concept of this circular tree pond not only focuses on practicality, but also integrates aesthetics and environmental protection, making it a beautiful landscape in the park. Whether it's a hot summer day or a cold winter day, this circular tree pond is a refreshing place to feel the beauty and infinite charm of nature.

## Artistic Concrete Leisure Bench

The Art Concrete Leisure Bar Stool is not just a practical seat, it is also artistic. Whether placed in parks, streets or indoor spaces, Art Concrete Leisure Benches can create a unique artistic atmosphere for the city. The Art Concrete Leisure Stool is not only beautiful and practical, but also brings an artistic enjoyment to the city. It can combine the city landscape and art perfectly, so that people can feel the beauty of art and enjoy the tranquility of nature in their leisure time.

## Artistic Concrete Flying Saucer Tree Pool

Artistic Concrete Flying Saucer Tree Pool is a creative urban landscape product with a unique and futuristic design in the shape of a flying saucer. This tree pool is made of high performance concrete, with high strength and durability, able to withstand a variety of climatic and environmental tests. At the same time, the surface is smooth and delicate, quite texture, can add a unique sense of beauty for the city. It also has unique environmental characteristics. Made of high-performance concrete materials, not only has excellent durability, but also can reduce the waste of resources and pollution of the environment, is a very environmentally friendly urban landscape products.

## Artistic Concrete Custom Monuments

Artistic Concrete Custom Monument is a unique way to commemorate the occasion, which is made of high performance concrete material that has been carefully crafted to provide outstanding compressive strength and durability. It is made from one-to-one molds according to the client's requirements and design, ensuring that every detail is taken care of. Not only does this monument have a natural texture and rustic, solemn appearance, but it also blends in with the entire memorial plaza, allowing for a profoundly memorialized atmosphere.

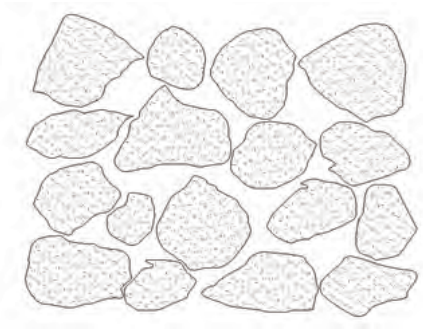

## Artistic Concrete Flower Box

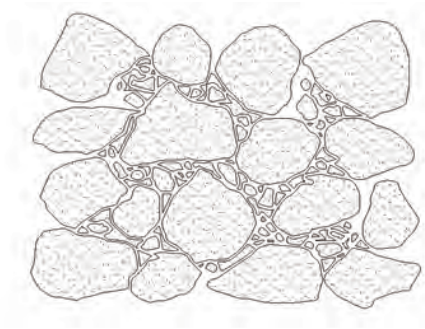

Artistic Concrete Flower Box is an urban landscape product that combines art and practicality. Made of high-performance concrete with exceptional strength and durability, it withstands various climates and environments. Its smooth, delicate surface adds unique beauty to the city. Each carefully designed planter echoes the surrounding environment, creating a distinctive artistic atmosphere whether placed on streets or in parks.

# EHPC ARTISTIC CONCRETE CURTAIN WALL

## EHPC Basic Configuration Principle

## EHPC Physical Characteristics

- Compressive strength: 60-100MPa.
- Fiber reinforced; improve toughness; flexural strength: 12-25MPa.
- Low water-cement ratio → high density → low porosity → microstructure.
- Better self-compacting property.
- High volume stability and good durability.
- Higher freeze-thaw cycle performance.
- Low permeability and high corrosion resistance.

## EHPC Application Features

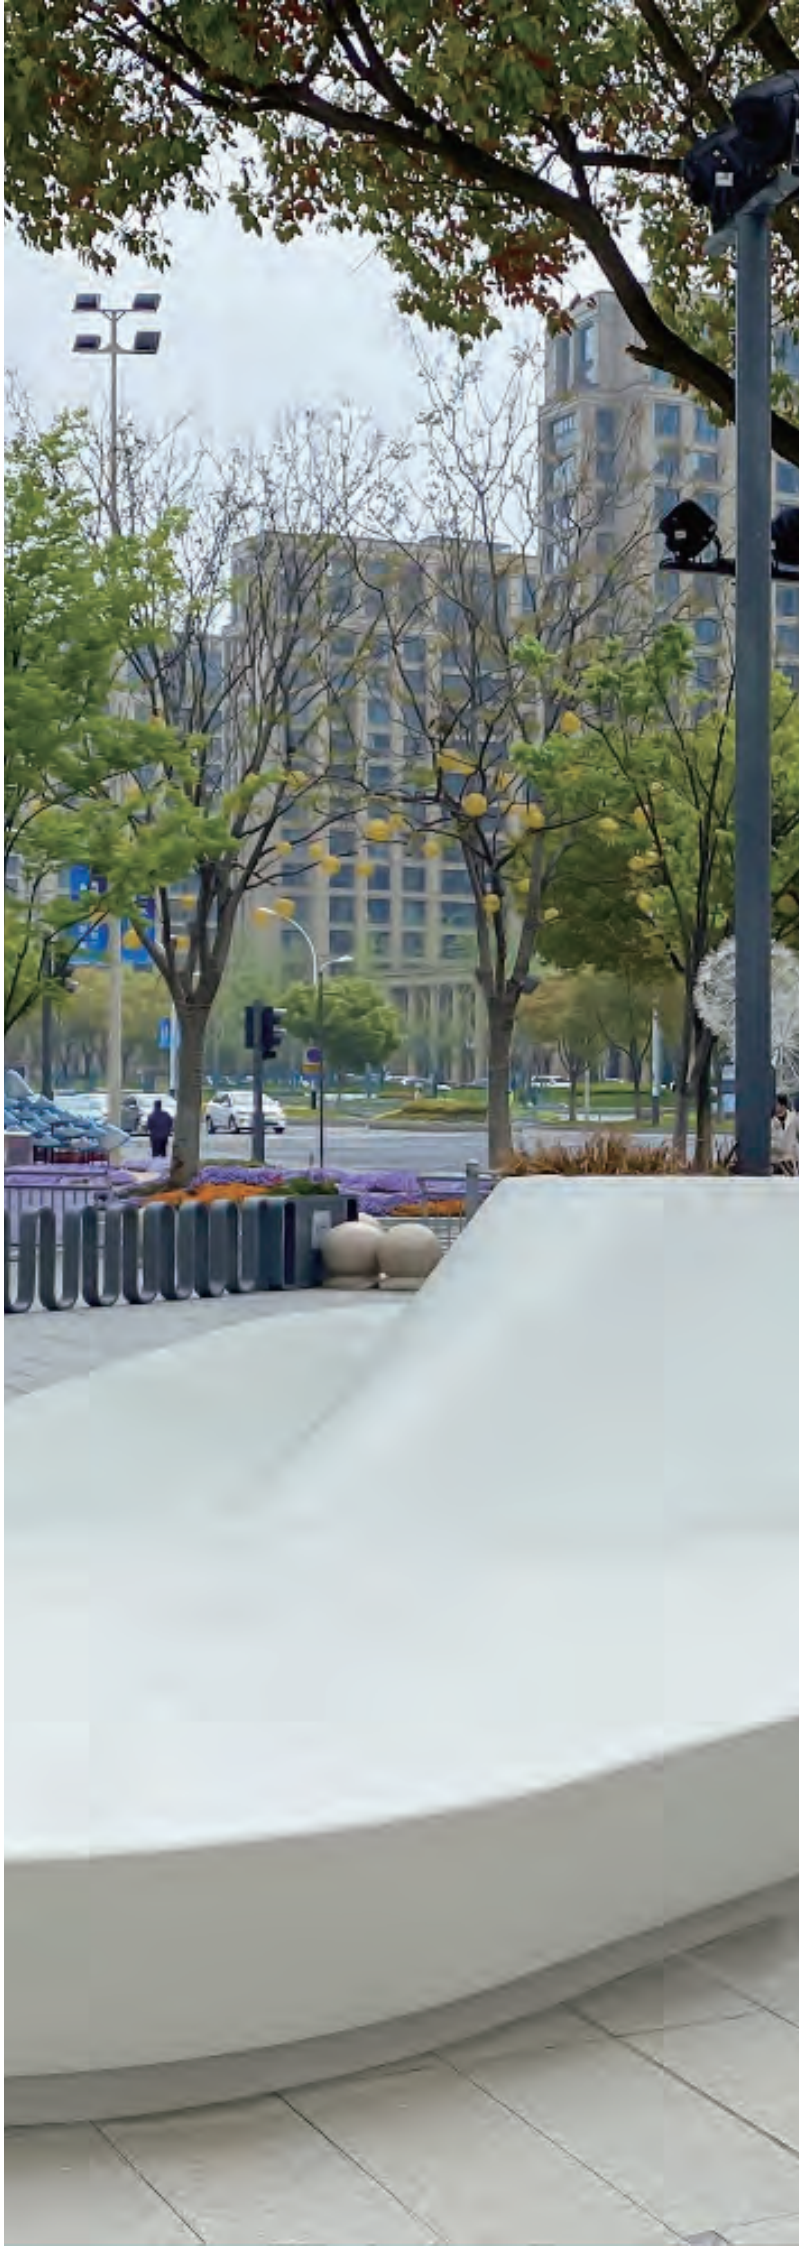

- Mechanical properties - high compressive and flexural strength; high durability - frost and seepage resistance higher than ordinary soil mixes.
- Excellent aesthetics - production of the surface and geometric patterns of the molds, with a fine texture that is comparable to that of a work of art.
- Good plasticity - can realize any curved surface, hollow shape, is the ideal material to realize the aesthetics of architecture.
- Hydrophobic and stain-resistant ability, making it self-cleaning.
- Sustainability - the unique structure solves environmental problems.
- Reduced construction costs, tooling costs, labor costs and maintenance costs, improving safety, speed of construction and building life cycle.
